January 13, 2016: *Pesticide Licensing Training Course– Day 2*

[Read More about these events.](#)

Advisory Board

Here at the Agriculture Center of Excellence, we rely on our Advisory Board for input, feedback, and the opportunity to build and strengthen any connections. Without them, our operations wouldn't be as effective, and we value their continued support and feel as if they are a part of our team. We'd like to take this time to introduce you to a few of our Advisory Board Members! [Read More.](#)

Handy Humics

Humic acids are becoming a multipurpose tool for superintendents. Superintendent, Chris Threatt, began using humic acid on a problem green at Cypress Golf Club, and now has turf roots growing through a previously impenetrable black layer. "Notice, too, how some of the black layer is breaking down and bleeding down through the column," he says. [Read More.](#)

5-Year Plan

The Agriculture Center of Excellence recently held a three part planning meeting with their Advisory Board members, led by Dave Cunningham from Cunningham Enterprises. The group convened on three separate occasions to discuss the Ag Center's mission and activities, focusing on a five year plan, with discussions around the latest technologies, most needed trainings, and education needs in the agriculture industry. [Read More.](#)

ACE Reflections

With the new school year having recently begun, we're excited to move forward, using information we've gathered over the summer. Bringing focus to the Ag Center has been on the forefront of our agenda, and our summer activities have lent to our team recognizing what needs done, and how we plan to do it. [Read More.](#)
